# Hello World View

Create Hello World View

- In VSC, create a file called `hello.blade.php` underneath
  `kodeblog\mystore\resources\views\hello.blade.php`

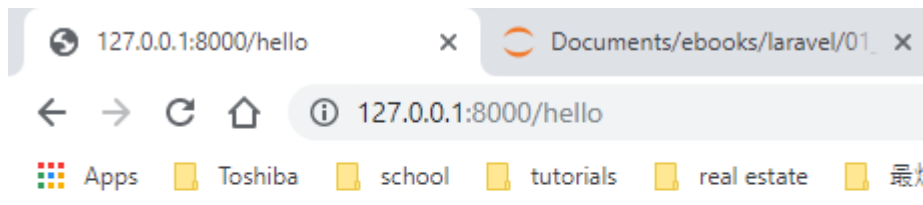

Return Hello World View

- In VSC, open file `kodeblog\mystore\app\Http\Controllers\HelloController.php`
- Change index return to hello view

Results

- In `cmder` , start server
- In browser, access `http://127.0.0.1:8000/hello`

Commit Step

- In `cmder`

```
Ctrl + C
cd ..
clear
git status
git add .
git commit -m "hello world view"
```
